

PROJECT COMPONENT	DESCRIPTION
1. PROJECT TITLE	Back To school Campaign
2.PROJECT JUSTIFICATION	There is a lack of knowledge and qualification for displaced children in Iraq because they didn't have the appropriate conditions for education. Back To School campaign aims to provide them with what they need from school supplies so that they can work better and produce better results throughout the school year.
3.PROJECT GOALS	<p>(a) Providing backpacks filled with essential school supplies to 50 displaced children from September to December 2017</p> <p>(b) Create a donation box in my school to help 50 displaced children by buying them toys from September to February 2017.what I mean by this is that after we finish the first goal we will make a donation box in my school where students can donate money throughout the first course of the school year which is for like 4 months and after the end of it we will buy with the money toys for the children as a reward so that they can celebrate their holiday with joy.</p>
4.PROJECT STEPS (Resources and Roadblocks)	<p>September 10th: Get volunteers by asking close friends of mine from school, family members or from my neighborhood to help me with the campaign.</p> <p>September 11th: Promote Back to School Campaign to an audience of my friends, relatives and neighbors to help me gather funding for the campaign.</p> <p>September 12th: Go to the school supplies store and buy the needed amount.</p> <p>September 13th: Implement my campaign in a IDPs camp. The resources that I need is to find an IDPs camp in Baghdad and try to find ways to get close to the kids.</p>
5.PROJECT OUTCOMES	To measure project outcomes, I will revisit the school, handle them a survey and ask them to fill the questions to see if they think that this kind of campaigns are helpful for displaced children and if they see any difference in the kids themselves.
